### Пример размещения функциональных элементов

*Участок кода, отвечающий за удаление выделенных объектов*

```

215 void ATradeviewPlayerController::DeleteObject()
216 {
217     if (GEngine)
218     {
219         if (SelectedObject)
220         {
221             GEngine->AddOnScreenDebugMessage(-1, 15, FColor::Red, FString::Printf(TEXT("Selected Object is %s"), *SelectedObject->GetName()));
222             TArray<USceneComponent*> ChildrenComponents;
223             SelectedObject->GetChildrenComponents(true, ChildrenComponents);
224             for (int i = 0; i < ChildrenComponents.Num(); i++)
225             {
226                 ChildrenComponents[i]->DestroyComponent();
227             }
228             SelectedObject->DestroyComponent();
229             SelectedObject = NULL;
230             GetWorld()->GetFirstPlayerController()->CurrentMouseCursor = EMouseCursor::Default;
231         }
232         else
233         {
234             GEngine->AddOnScreenDebugMessage(-1, 15, FColor::Red, FString::Printf(TEXT("Select any object first")));
235         }
236     }
237 }

```
